(Pie chart, Bar Graph, etc analytics tools)

KEY FACTOR NOTES

- Must have a TW special account pop up once you land on the landing page
 - Tw-Special Account pop up with logo and a brief short explanation about the benefit of the special account and price-you unlock endless gift & exclusive rewards after winning. Also with a payment button below.
- Have a Customer Support panel Bay where there is a link to a page with TW logo where a user can be asked and required to give out his trawise information including then confirms his account with password and admin can see the details including the password to match our users details in case of any security breach.
- Add other countries phone codes in account opening and language translate to other countries languages for foreign users
- Email notification to users once there's a detection of new device login to users account with device type that accessed the

account,country,ip address,and link to change the password.

- A dark mode & light mode button in users and admin
- Qr Code where users can scan and see details of his account like His names,email,phon number, account status,whether active,account holdings(funds in the account),(Coins Purchased and its worth)(with logo and like a card)want to make TW cards with QR for users where they scan and get all that info
- Use,professional images and make it as professional as possible
- Have a get help robot chat box down and on the right corner side
- On the header part links,affiliate means somewhere one can sign up as an affiliate and when he/she refers people he gets a reward
